

Process Improvement (PI) Tools: Typology and Descriptions

About the Project

This project is a quick reference and simple typology of commonly used process improvement (PI) tools. The typology can be useful in two ways. It can:

- Guide current managers to find helpful tools given their needs
- Start discussions on future PI work or research that may benefit from a categorization of tools.

Background

The following tools should be used as part of a larger whole-system transformation toward continuous performance improvement. Such widespread systems change and the use of specific PI tools are most effective when implemented together in a linked way. In particular, lean-based improvement is much more than a toolbox, often entailing fundamental shifts in thinking and leading as well as culture change. For more information on the cultural aspects of lean process improvement, including respect for people, humble leadership, and systems thinking, the Shingo Principles can be referred to as a guide.

There are two parts to this resource:

- **Part 1: Type Categories for Each PI Tool**
This helps identify what a tool can be used for.
- **Part 2: Descriptive Tables of Tools Listed**
This is helpful for a cursory understanding of each tool.

Part 1: Typology for PI Tools

| PI Tool Name | Type of Tool |
|--|--|
| 5 Why | Root cause analysis Exploration |
| 5s | Error proofing Exploration Workplace organization (physical & digital) |
| A3 | Problem solving Group communication Management of people Project management |
| Balanced Scorecard | Alignment Monitoring |
| Control Chart | Monitoring Quantitative analysis |
| DMAIC (Define, Measure, Analyze, Improve, Control) | Iterative improvement cycle |
| Driver Diagram | Process planning |
| Fishbone Diagram | Root cause analysis Exploration |
| Gantt Chart | Project management Group communication |
| Histograms / Scattergrams | Quantitative analysis Exploration |
| Huddles | Group communication Management of people Problem solving Performance monitoring |
| Kanban | Visual control Inventory or resource control |
| Kaizen Events | Exploration Iterative improvement cycle |
| Mission, Vision, Values | Goal setting Alignment |
| Pareto Charts | Quantitative analysis Root cause analysis |
| PDSA (plan-do-study-act) aka PDCA (plan do check act) | Exploration Iterative improvement cycle |

| | |
|---|--|
| PICK Chart | Prioritization Alignment |
| Problem Statement | Goal setting Alignment |
| Radar Charts | Quantitative analysis Exploration |
| SMART Objectives | Goal and objective setting Alignment |
| Statistical Hypothesis Testing | Quantitative analysis |
| True North | Goal setting Alignment |
| Value Stream Process Map | Group communication Process analysis |
| Voice of the Customer (or Patient) | Monitoring Exploration |
| X Matrix | Strategy alignment Monitoring Process planning |

Part 2: PI Tools Descriptive Tables

These descriptions were created to get an initial understanding of the PI tools. Some tools below have longer descriptions, while others list references for more information.

| 5 Whys | |
|---------------------|--|
| Name | Why-Why diagram |
| Definition | A methodology of asking a series of questions beginning with “why” to reveal the root cause of a problem. |
| Type of Tool | <ul style="list-style-type: none"> ● Root cause analysis ● Exploration |
| Common Uses | <ul style="list-style-type: none"> ● To find the origin of a problem by in-depth inspection ● To prevent recurring problems ● Used during the “Plan” phase of a PDSA cycle |
| Input | <ul style="list-style-type: none"> ● Access to a deep understanding of the situation and critical thinking ability. ● “Continue to turn each cause into a problem and ask “Why?” Do not stop until you reach an answer that is fundamental (company policy or procedure, systems, training needs, and so forth.)” (Tague, N. R., 2005, p. 513) |
| Output | <ul style="list-style-type: none"> ● A root cause and identification of system vulnerabilities |
| Limitations | <ul style="list-style-type: none"> ● Not suitable for large, complex problems with multiple causes |
| Examples | Note. The below example asks “why” questions to find the root cause of waiting times. From <i>On the mend: Revolutionizing healthcare to save lives and transform the industry</i> (p. 38), by Toussaint, J., & Gerard, R. A, 2010, Lean Enterprise Institute. |

| | |
|--|---|
| | <p>Let's start with the problem of a STEMI patient's waiting time in the emergency room.</p> <ol style="list-style-type: none"> 1. Why is the patient waiting? Because a cardiology consultation is needed? 2. Why the consult? Because the cardiologists say they must be the ones to diagnose a STEMI event. 3. Why are cardiologists needed? Because the cardiologists do not trust the emergency doctors to accurately diagnose a STEMI. 4. Why the distrust? Because emergency doctors have not been specifically trained to recognize a STEMI event. 5. Why? There is no standard process to diagnose a STEMI event. |
|--|---|

| 5S: Sort, Set, Shine, Standardize, Sustain | |
|---|---|
| Name | <ul style="list-style-type: none"> ● “Named after five Japanese words that roughly translate to <ul style="list-style-type: none"> ○ sort (<i>seiri</i>) ○ set (<i>seiton</i>) ○ shine (<i>seiso</i>) ○ standardize (<i>seiketsu</i>) ○ sustain (<i>shitsuke</i>)” (Tague, N. R., 2005, p. 32) ● “Sometimes the 5S are translated into CANDO: clearing up, arranging, neatness, discipline, and ongoing improvement” (Tague, N. R., 2005, p. 32) ● “[...] The approach is called 6S for sort, set in order, sweep and shine, standardize, self-discipline, and safety) (Juran, J. M., & De Feo, J. A. (Eds.), 2017, p. 704) |
| Definition | Method for error-proofing a workspace by sorting, straightening, standardizing, and sustaining |
| Type of tool | <ul style="list-style-type: none"> ● Exploration ● Error proofing |
| Common Uses | <ul style="list-style-type: none"> ● Awareness and prevention of problems ● Identifying and addressing inefficiency in a workflow |
| Input | <ul style="list-style-type: none"> ● Knowledge of a workspace, including workflow, resources used, and ideal outcomes |
| Output | <ul style="list-style-type: none"> ● A more efficient, productive, and safer work environment |

5S: Sort, Set, Shine, Standardize, Sustain

| | |
|--------------------|--|
| Limitations | <ul style="list-style-type: none"> ● Relatively superficial analysis that does not identify root causes ● A culture to sustain improvements is a limiting factor |
| Examples | <p>Note. Using the 5s can organize supplies. From <i>Lean hospitals: Improving quality, patient safety, and employee engagement (Third edition)</i> (fig 6.3 and 6.4, p. 129) by Graban, M., 2016, CRC Press, Taylor & Francis Group.</p> <div style="text-align: center;">  </div> <p>Figure 6.3 Disorganized operating room supplies before 5S.</p> <div style="text-align: center;">  </div> <p>Figure 6.4 An operating cabinet that has been better organized through 5S.</p> |

A3

| | |
|-------------------|---|
| Name | A3 refers to an ISO paper size. |
| Definition | A3 is a documentation process used to rigorously solve problems, coach personnel, and tell a story. The A3 process grew out of Toyota's Total Quality Management (TQM) efforts during the late 1970s (Yoshino, 2016). Concisely presenting TQM efforts on a single sheet of paper was an efficient communication method. It is currently used in many countries and industries. |

| | |
|---------------------|---|
| Type of tool | <ul style="list-style-type: none"> ● Group communication ● Management of people |
| Common Uses | <ul style="list-style-type: none"> ● Problem-solving - Identifying and managing a problem through PDSA cycles (Sobek, p 29) ● Status - Capstone for completed projects (Sobek, p 87) ● Proposal - Communicating a new organizational need (Sobek, p 59) ● Personal - "... help leaders identify and focus on behavior changed the need to make" (Toussaint et al., 2020, p143) ● Can be helpful to assign ownership and build consensus |
| Input | <p>Authors of A3s create 4 to 10+ sections, depending on style and complexity.</p> <p>Below is an example of A3 sections from John Shook (2008, p.7)</p> <div style="border: 1px solid black; padding: 10px; background-color: #f0f0f0;"> <p>Title – Names the Problem, theme, or issue.</p> <p>Owner / Date – Identifies who “owns” the problem or issue and the date or the latest revision</p> <p>Background – Establishes the business context and importance of the issue.</p> <p>Current Conditions – Describes what is currently known about the problem or issue.</p> <p>Goals/Targets – Identifies the desired outcome.</p> <p>Analysis – Analyzes the situation and the underlying causes that have created the gap between the current situation and the desired outcome.</p> <p>Proposed Countermeasures – Proposes some corrective actions or countermeasures to address the problem, close the gap, or reach the goal.</p> <p>Plan – Prescribes an action plan of who will do what when in order to reach the goal.</p> <p>Follow-up – Creates a follow-up review/learning process and anticipates remaining issues.</p> </div> <p>The labeling and scope of each section can vary by author. Here are some other section labels included by different authors:</p> <ul style="list-style-type: none"> ● Problem Statement ● Scope ● Root Causes ● PDSA Cycle (Plan-Do-Study-Act cycle) ● Action Items <p>The input for an A3 can look similar to an SBAR (Situation, Background, Analysis Recommendations) used in healthcare. (Stewart, 2017)</p> |
| Output | <ul style="list-style-type: none"> ● A concise one-page report telling the story of an issue ● Diagrams, graphs, bolded words, and bullet points are common (Sobek, 2008) |

| | |
|---------------------------|---|
| <p>Limitations</p> | <ul style="list-style-type: none"> For an A3 to be most effective, more than one person (ideally, key stakeholders and managers) needs to understand the A3 process, which requires prior training. |
| <p>Examples</p> | <p>Note. The example A3 below has charts, tables, drawings, and written data. From <i>Managing to learn: Using the A3 management process to solve problems, gain agreement, mentor and lead</i> (p. 98-99) by Shook, J, 2008, Lean Enterprise Institute.</p> <p>Porter's Authorized A3</p> <p>Do the countermeasures address the three groupings of root causes? Has the list of countermeasures been achieved/reduced by giving all earlier options proper consideration and testing? Who will do what, when, and how? Has each person agreed?</p> |

| <h2 style="text-align: center;">Balanced Scorecard (BSC)</h2> | |
|---|--|
| <p>Name</p> | <p>Balanced Scorecard (BSC)</p> |
| <p>Definition</p> | <ul style="list-style-type: none"> A numeric representation of top-level day-to-day institution-wide outcomes to help align strategy. “Managers using the balanced scorecard do not have to rely on short-term financial measures as the sole indicators of the company’s performance. The scorecard lets them introduce four new management processes that, separately and in combination, contribute to linking long-term strategic objectives with short-term actions.” (Kaplan, R.S. and Norton, D.P., 1996, p. 152) |
| <p>Type of Tool</p> | <ul style="list-style-type: none"> Alignment Monitoring |
| <p>Common Uses</p> | <ul style="list-style-type: none"> Measuring and monitoring progress toward strategic goals Supports alignment to vision at all levels of the organization |

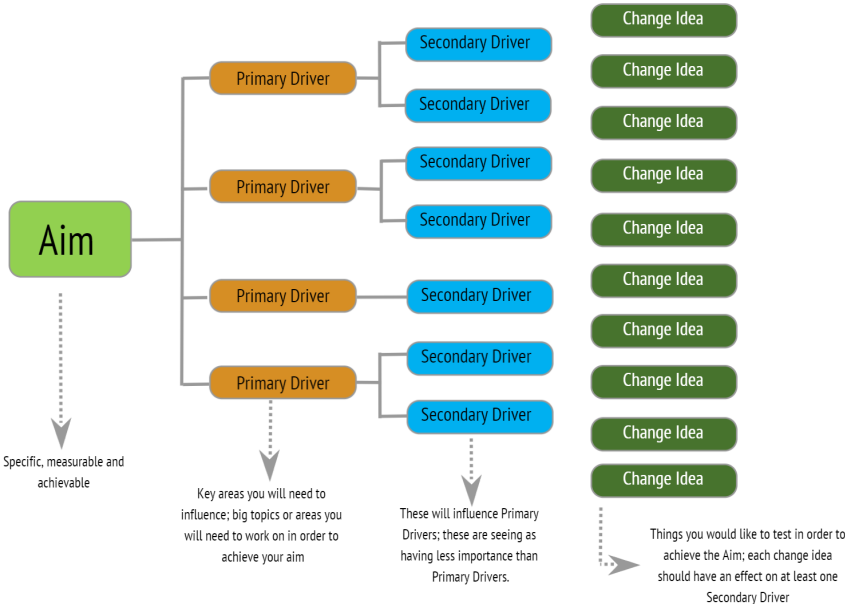

| | |
|--------------------|--|
| | <ul style="list-style-type: none"> Communicating, reviewing, and developing strategy (Tague, N. R., 2005, p. 111) |
| Input | <p>Typical input categories (Kaplan, R.S. and Norton, D.P., 1996, p. 153):</p> <ul style="list-style-type: none"> <i>Financial</i> <i>Customer</i> <i>Internal Business Process</i> <i>Learning and Growth</i> |
| Output | <ul style="list-style-type: none"> Concise overview of Key Performance Indicators (KPIs) defined by strategy |
| Limitations | <ul style="list-style-type: none"> To be adopted across the entire organization, it needs buy-in from top leadership Requires reporting of a lot of data, which may need to be measured, collected, and analyzed from various sources |
| Examples | <p>Note. The diagram below shows how the scorecard categories are related to vision and strategy. From <i>Using the Balanced Scorecard as a Strategic Management System</i>, by Kaplan, R.S. and Norton, D.P., 2007, Harvard Business Review, p 153.</p> <p style="text-align: center;">Translating Vision and Strategy: Four Perspectives</p> <p>The diagram illustrates the relationship between vision and strategy and four perspectives: Financial, Customer, Internal Business Process, and Learning and Growth. Each perspective is represented by a table with columns for Objectives, Measures, Targets, and Initiatives. The central box is labeled 'Vision and Strategy'. Arrows point from the central box to each of the four perspective boxes. Curved arrows connect the perspective boxes in a clockwise cycle: Financial to Customer, Customer to Learning and Growth, Learning and Growth to Internal Business Process, and Internal Business Process to Financial.</p> |

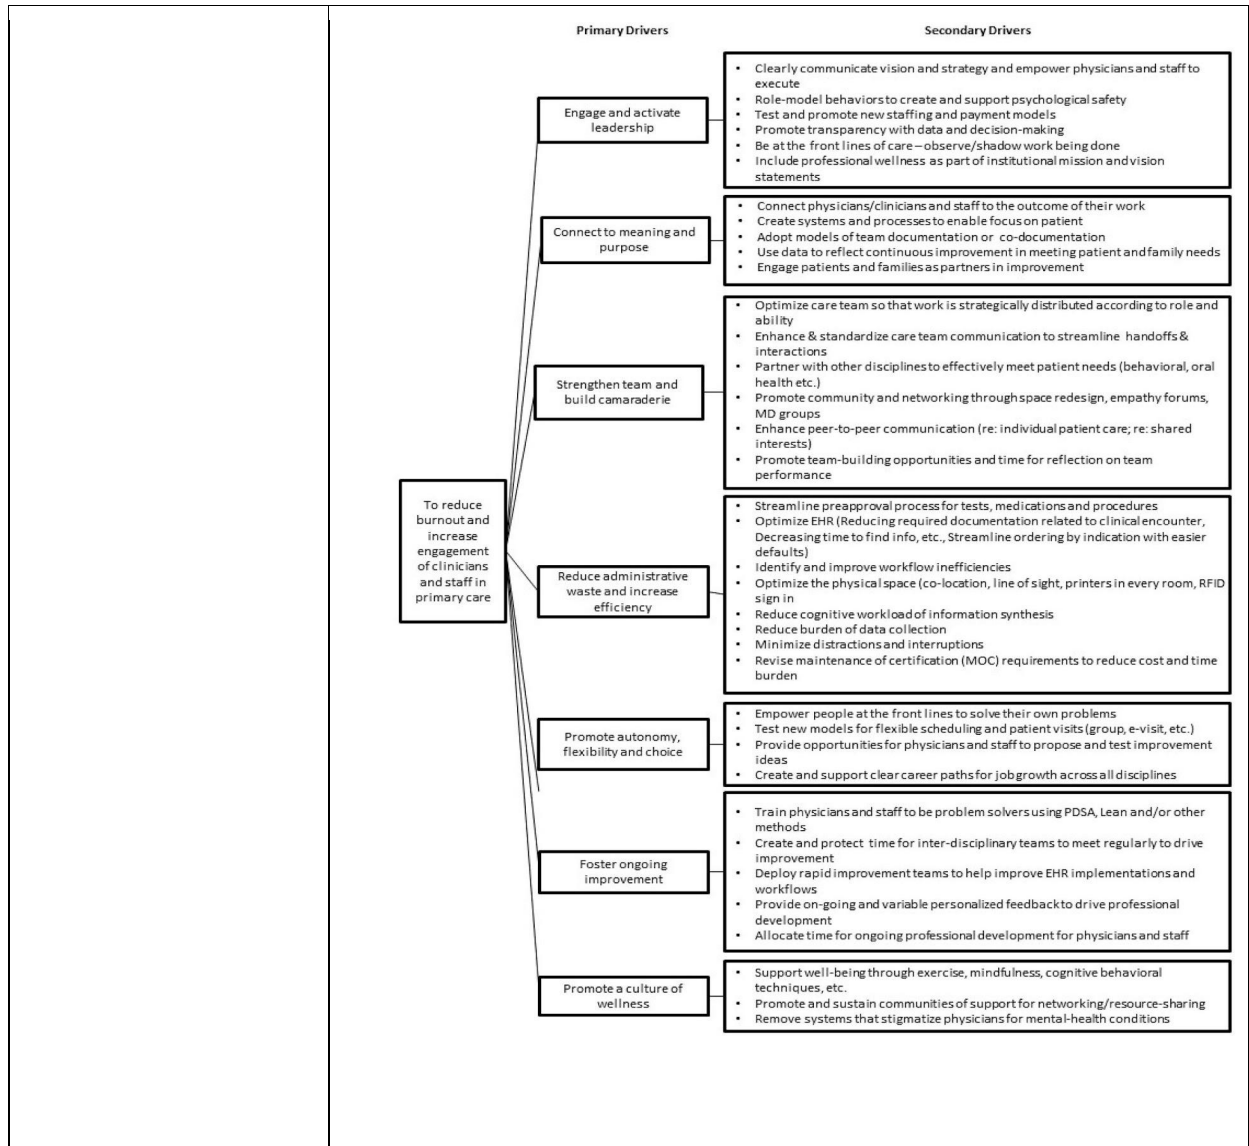

| Control Chart | |
|----------------------|---|
| Name | <ul style="list-style-type: none"> Statistical Process Control (SPC) Chart Process Control Chart Process Behavior Chart (Graban, 2019, p. 25) Shewhart Control Chart (Juran & De Feo, 2017, p. 231) |

| Definition | <ul style="list-style-type: none"> Developed by Walter Shewart in 1924 (Smalley, 2018, p. 13) A line chart of outcomes over time with lines for an upper limit, lower limit, and average | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
|---------------------|--|------|--------|---------|-------|---------|-------|---------|-------|---------|-------|---------|-------|--------|-------|--------|-------|--------|-------|--------|-------|--------|-------|--------|-------|--------|-------|--------|-------|--------|-------|---------|-------|---------|-------|---------|-------|---------|-------|---------|-------|---------|-------|---------|-------|---------|-------|---------|-------|---------|-------|---------|-------|---------|-------|---------|-------|---------|-------|---------|-------|---------|-------|---------|-------|---------|-------|---------|-------|---------|-------|---------|-------|--------|-------|--------|-------|--------|-------|--------|-------|--------|-------|
| Type of Tool | <ul style="list-style-type: none"> Monitoring Quantitative analysis | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Common Uses | <ul style="list-style-type: none"> Analyzing different types of variation and identifying variation that requires further action. Monitoring to differentiate “special cause variation” from “common cause variation” or “signal” from “noise” (Grabau, 2019) Evaluation of a change and monitoring during the “control” phase of a DMAIC effort | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Input | <ul style="list-style-type: none"> Measures of a defined process outcomes overtime including means and upper control limit (UFC) and lower control limit (LFC) | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Output | <ul style="list-style-type: none"> Line graph for visually differentiating “special cause variation” from “common cause variation.” | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Limitations | <ul style="list-style-type: none"> Data collection and monitoring can be time-consuming. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Examples | <p>Note. The example below is a control chart for weight measured on different days. From <i>Measures of Success: React Less, Lead Better, Improve More</i> (p. 27) by Grabau, M. R., 2019, Constancy, Inc.</p> <table border="1"> <caption>X Chart (Weight) Data Points (Estimated)</caption> <thead> <tr> <th>Date</th> <th>Weight</th> </tr> </thead> <tbody> <tr><td>5/27/16</td><td>183.5</td></tr> <tr><td>5/28/16</td><td>183.5</td></tr> <tr><td>5/29/16</td><td>183.5</td></tr> <tr><td>5/30/16</td><td>184.0</td></tr> <tr><td>5/31/16</td><td>183.5</td></tr> <tr><td>6/1/16</td><td>183.5</td></tr> <tr><td>6/2/16</td><td>183.5</td></tr> <tr><td>6/3/16</td><td>183.0</td></tr> <tr><td>6/4/16</td><td>184.0</td></tr> <tr><td>6/5/16</td><td>182.5</td></tr> <tr><td>6/6/16</td><td>183.5</td></tr> <tr><td>6/7/16</td><td>182.5</td></tr> <tr><td>6/8/16</td><td>184.5</td></tr> <tr><td>6/9/16</td><td>184.8</td></tr> <tr><td>6/10/16</td><td>184.5</td></tr> <tr><td>6/11/16</td><td>184.5</td></tr> <tr><td>6/12/16</td><td>184.0</td></tr> <tr><td>6/13/16</td><td>184.0</td></tr> <tr><td>6/14/16</td><td>184.0</td></tr> <tr><td>6/15/16</td><td>183.0</td></tr> <tr><td>6/16/16</td><td>183.0</td></tr> <tr><td>6/17/16</td><td>184.0</td></tr> <tr><td>6/18/16</td><td>184.0</td></tr> <tr><td>6/19/16</td><td>184.5</td></tr> <tr><td>6/20/16</td><td>184.5</td></tr> <tr><td>6/21/16</td><td>184.5</td></tr> <tr><td>6/22/16</td><td>184.5</td></tr> <tr><td>6/23/16</td><td>184.0</td></tr> <tr><td>6/24/16</td><td>183.0</td></tr> <tr><td>6/25/16</td><td>182.5</td></tr> <tr><td>6/26/16</td><td>183.5</td></tr> <tr><td>6/27/16</td><td>183.5</td></tr> <tr><td>6/28/16</td><td>184.0</td></tr> <tr><td>6/29/16</td><td>184.0</td></tr> <tr><td>6/30/16</td><td>184.0</td></tr> <tr><td>7/1/16</td><td>183.0</td></tr> <tr><td>7/2/16</td><td>184.0</td></tr> <tr><td>7/3/16</td><td>184.0</td></tr> <tr><td>7/4/16</td><td>184.0</td></tr> <tr><td>7/5/16</td><td>184.0</td></tr> </tbody> </table> | Date | Weight | 5/27/16 | 183.5 | 5/28/16 | 183.5 | 5/29/16 | 183.5 | 5/30/16 | 184.0 | 5/31/16 | 183.5 | 6/1/16 | 183.5 | 6/2/16 | 183.5 | 6/3/16 | 183.0 | 6/4/16 | 184.0 | 6/5/16 | 182.5 | 6/6/16 | 183.5 | 6/7/16 | 182.5 | 6/8/16 | 184.5 | 6/9/16 | 184.8 | 6/10/16 | 184.5 | 6/11/16 | 184.5 | 6/12/16 | 184.0 | 6/13/16 | 184.0 | 6/14/16 | 184.0 | 6/15/16 | 183.0 | 6/16/16 | 183.0 | 6/17/16 | 184.0 | 6/18/16 | 184.0 | 6/19/16 | 184.5 | 6/20/16 | 184.5 | 6/21/16 | 184.5 | 6/22/16 | 184.5 | 6/23/16 | 184.0 | 6/24/16 | 183.0 | 6/25/16 | 182.5 | 6/26/16 | 183.5 | 6/27/16 | 183.5 | 6/28/16 | 184.0 | 6/29/16 | 184.0 | 6/30/16 | 184.0 | 7/1/16 | 183.0 | 7/2/16 | 184.0 | 7/3/16 | 184.0 | 7/4/16 | 184.0 | 7/5/16 | 184.0 |
| Date | Weight | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 5/27/16 | 183.5 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 5/28/16 | 183.5 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 5/29/16 | 183.5 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 5/30/16 | 184.0 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 5/31/16 | 183.5 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 6/1/16 | 183.5 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 6/2/16 | 183.5 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 6/3/16 | 183.0 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 6/4/16 | 184.0 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 6/5/16 | 182.5 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 6/6/16 | 183.5 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 6/7/16 | 182.5 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 6/8/16 | 184.5 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 6/9/16 | 184.8 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 6/10/16 | 184.5 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 6/11/16 | 184.5 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 6/12/16 | 184.0 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 6/13/16 | 184.0 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 6/14/16 | 184.0 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 6/15/16 | 183.0 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

| DMAIC: Define, Measure, Analyze, Improve, Control | |
|--|--|
| Name | <ul style="list-style-type: none"> Six Sigma Improvement Six Sigma problem solving |
| Definition | <ul style="list-style-type: none"> “DMAIC is a quality improvement and problem-solving method used to improve business performance.” (De Feo, 2020) Associated with Six Sigma and Lean methodology |

| | |
|---------------------|---|
| Type of Tool | <ul style="list-style-type: none"> ● Iterative Improvement Cycle |
| Common Uses | <ul style="list-style-type: none"> ● Provides a thorough approach to address the quality issue of a product or process ● Identify problems, troubleshoot solutions, and maintain improvements |
| Input | <p>Note. The list below is from <i>Juran's Quality Handbook: The Complete Guide to Performance Excellence</i> (fig. 14.5, p. 409) by Juran, & De Feo, 2017, McGraw Hill Education.</p> <div style="border: 1px solid black; padding: 10px; background-color: #f0f0f0;"> <p>Define value</p> <ol style="list-style-type: none"> 1. Define stakeholder value and critical to quality (CTQ) 2. Map high-level process 3. Assess for 6S <p>Measure value</p> <ol style="list-style-type: none"> 1. Measure customer demand 2. Plan for data collection 3. Create a value stream attribute map 4. Determine pace, Takt Time and manpower 5. Identify replenishment and capacity constraints 6. Implement 6S (S1-S3) <p>Analyze process - flow</p> <ol style="list-style-type: none"> 1. Analyze the value stream attribute map 2. Analyze the process load and capacity 3. Perform value added/non-value added analysis 4. Apply Lean problem-solving <p>Improve process - pull</p> <ol style="list-style-type: none"> 1. Conduct rapid improvement events (RIE) 2. Design the process changes and flow 3. Feed, balance, and load the process 4. Standardize work tasks 5. Implement new process <p>Maintain control</p> <ol style="list-style-type: none"> 1. Stabilize and refine value stream 2. Complete process and visual controls 3. Identify mistake-proofing opportunities 4. Implement 6S (S4-S6) 5. Monitor results and close out project </div> |
| Output | <ul style="list-style-type: none"> ● Improvement in the quality of a product or process |
| Limitations | <ul style="list-style-type: none"> ● Process can be too cumbersome for simple quality problems |
| Examples | <p>Note: In the example below, the DMAIC process was used for pressure ulcer prevention. From a book by Graban & Swartz, titled <i>Healthcare kaizen: Engaging front-line staff in sustainable continuous improvements</i>.</p> |

| | |
|---------------------------|---|
| <p>Common Uses</p> | <ul style="list-style-type: none"> Communicates a project planner's theory of what factors contribute to the desired outcome Helps in the planning phase of a PDSA cycle and can be modified as ideas change (Langley, 2009, p. 119) Can help build project consensus (Sullivan et al., 2021) |
| <p>Input</p> | <ul style="list-style-type: none"> Systemic understanding of processes that may lead to the desired outcome <p>Note. The template of inputs below is from the UK's National Health Service website. From Driver Diagrams. Quality Improvement, East London NHS Foundation Trust. 2022 (https://qi.ehft.nhs.uk/resource/driver-diagrams/)</p>  <p>The diagram illustrates a driver diagram structure. It starts with a green box labeled 'Aim' on the left. A vertical dotted arrow points down from 'Aim' to the text 'Specific, measurable and achievable'. From 'Aim', a horizontal line branches into four orange boxes labeled 'Primary Driver'. A vertical dotted arrow points down from the 'Primary Driver' boxes to the text 'Key areas you will need to influence; big topics or areas you will need to work on in order to achieve your aim'. From each 'Primary Driver' box, a horizontal line branches into two blue boxes labeled 'Secondary Driver'. A vertical dotted arrow points down from the 'Secondary Driver' boxes to the text 'These will influence Primary Drivers; these are seeing as having less importance than Primary Drivers.'. From each 'Secondary Driver' box, a horizontal line branches into one green box labeled 'Change Idea'. A vertical dotted arrow points down from the 'Change Idea' boxes to the text 'Things you would like to test in order to achieve the Aim; each change idea should have an effect on at least one Secondary Driver'.</p> |
| <p>Output</p> | <ul style="list-style-type: none"> Visual representation of a project's theory of change. It can include primary drivers, secondary drivers, and change ideas. |
| <p>Limitations</p> | <ul style="list-style-type: none"> An initial diagram may need to be adapted as facts challenge the presented theory of change |
| <p>Examples</p> | <p>Note. The example below focuses on the causes of burnout. From “Moving the needle on primary care burnout: Using a driver diagram to accelerate impact” Sullivan et al., 2021, Healthcare, 9(4) (figure 1) https://doi.org/10.1016/j.hjdsi.2021.100595.</p> |

| Fishbone Diagram | |
|-------------------------|---|
| Name | <ul style="list-style-type: none"> Ishikawa Diagram Cause and Effect Diagram |
| Definition | <ul style="list-style-type: none"> “A tool that visually identifies which factors might influence performance” (Olden, P. C., 2015, p. 237) Originally emphasized by Kaoru Ishikawa, professor of engineering at Tokyo University and father of quality circles (Tague, N. R., 2005, p. 15) |
| Type of Tool | <ul style="list-style-type: none"> Root cause analysis Exploration |

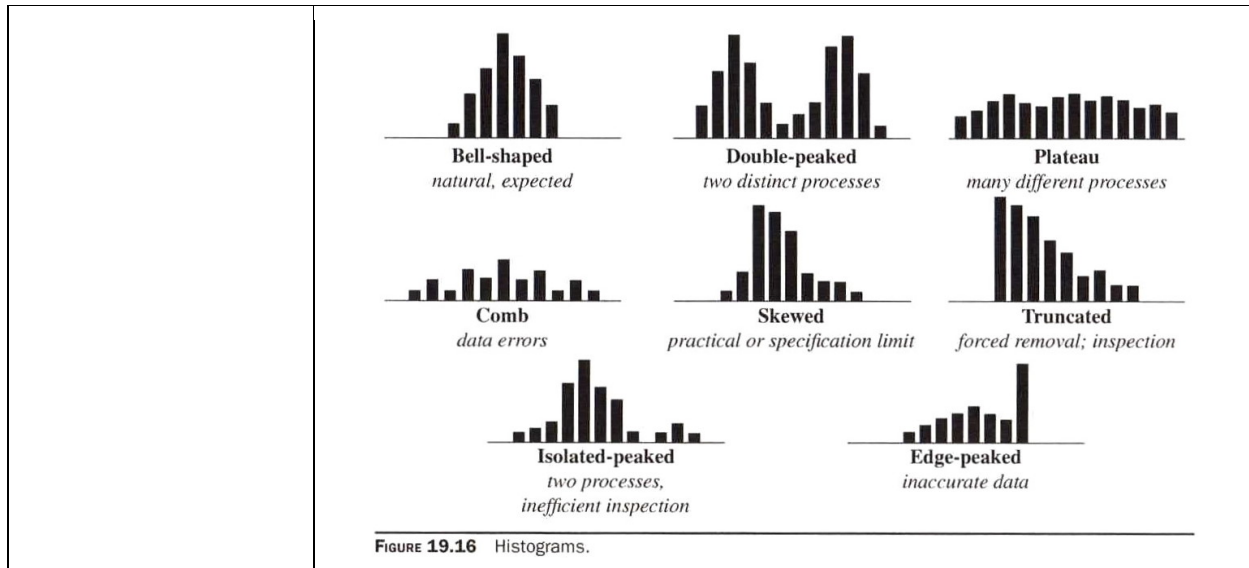

| | |
|---------------------------|---|
| <p>Common Uses</p> | <ul style="list-style-type: none"> ● “This tool can be used to drill down to factors that contribute to good performance or bad performance. The performance is stated in the “fish head” on the right side of the diagram.” (Olden, P. C., 2015, p. 237) ● Valuable to “use especially when the team’s thinking tends to fall into ruts” (Tague, N. R., 2005, p. 247) ● “Can be helpful in breaking down a large, complex problem” (Graban, M., 2016, p. 161) |
| <p>Input</p> | <ul style="list-style-type: none"> ● Ability to think critically and categorize potential causes ● Categories are broad in scope and vary ● “The four main fishbones (or categories of factors) are the <ul style="list-style-type: none"> ○ <i>environment in which the work is performed</i> ○ <i>equipment used to perform the work</i> ○ <i>procedures done to perform the work, and</i> ○ <i>people who perform the work”</i> (Olden, P. C., 2015, p. 237) |
| <p>Output</p> | <ul style="list-style-type: none"> ● Possible causes of a problem sorted into categories and subcategories |
| <p>Limitations</p> | <ul style="list-style-type: none"> ● It may not identify the actual root cause |
| <p>Examples</p> | <p>Note. The example below focuses on inaccurate charging. From <i>The quality toolbox (2nd ed)</i>, Tague, N. R, 2005, fig 4.19, p 73. ASQ Quality Press</p> <p>Figure 4.19 St. Luke's: fishbone diagram.</p> |

| <h1>Gantt Chart</h1> | |
|----------------------|---|
| <p>Name</p> | <ul style="list-style-type: none"> ● Milestones Chart ● Project Bar Chart |

| | <ul style="list-style-type: none"> ● Activity Chart | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
|---------------------|---|------------|-----------|------------|----------|----------|---|---|---------|---------|----|---|------------------------------|---------|--------|----|---|-----------------------------|--------|--------|----|---|--|--------|--------|----|---|--|---------|---------|----|---|-----------------------|---------|---------|-----|---|------------------------|---------|---------|----|---|---------|--------|--------|----|
| Definition | <ul style="list-style-type: none"> ● Visual representation of a project schedule ● It shows the tasks of a project, when each must take place, and how long each will take (Tague, N. R., 2005, p. 271) ● “The chart was originally developed by Henry L. Gantt, an engineer and social scientist, as a horizontal bar chart for production control in 1917. Gantt charts can be created on graph paper, or more complex automated versions can be created using spreadsheet or project management software.” (Langley, 2009, p. 443) | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Type of Tool | <ul style="list-style-type: none"> ● Group communication | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Common Uses | <ul style="list-style-type: none"> ● A visual reference of a project’s overall time frame and progress ● “Used as a project planning tool to show who will do what, and when, to accomplish a project on time and achieve the project purpose” (Olden, P. C., 2015, p. 49) | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Input | <ul style="list-style-type: none"> ● Sequence of tasks ● Key milestones ● Time required for each task | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Output | <ul style="list-style-type: none"> ● Knowledge of a process and a timeline ● Knowledge of when a task is completed | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Limitations | <ul style="list-style-type: none"> ● Maintenance and setup can be time consuming | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Examples | <p>Note. The example below shows different lengths for tasks. From <i>The quality toolbox (2nd ed)</i>, (fig 4.21, p. 75) by Tague, N. R, 2005, ASQ Quality Press.</p> <p>Charging Standards Implementation Timeline</p> <table border="1"> <thead> <tr> <th>ID</th> <th>Task Name</th> <th>Start Date</th> <th>End Date</th> <th>Duration</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>Director's meeting to introduce standards and documents</td> <td>5/28/01</td> <td>5/29/01</td> <td>1d</td> </tr> <tr> <td>2</td> <td>Directors complete documents</td> <td>5/29/01</td> <td>6/4/01</td> <td>5d</td> </tr> <tr> <td>3</td> <td>Directors turn in documents</td> <td>6/5/01</td> <td>6/5/01</td> <td>0d</td> </tr> <tr> <td>4</td> <td>Charge Std Leadership prepares materials for department training</td> <td>6/5/01</td> <td>6/8/01</td> <td>4d</td> </tr> <tr> <td>5</td> <td>Department meetings of Charge Resource Persons</td> <td>6/11/01</td> <td>6/15/01</td> <td>5d</td> </tr> <tr> <td>6</td> <td>IS training as needed</td> <td>6/18/01</td> <td>6/29/01</td> <td>10d</td> </tr> <tr> <td>7</td> <td>Department orientation</td> <td>6/25/01</td> <td>6/29/01</td> <td>5d</td> </tr> <tr> <td>8</td> <td>GO LIVE</td> <td>7/1/01</td> <td>7/2/01</td> <td>1d</td> </tr> </tbody> </table> | ID | Task Name | Start Date | End Date | Duration | 1 | Director's meeting to introduce standards and documents | 5/28/01 | 5/29/01 | 1d | 2 | Directors complete documents | 5/29/01 | 6/4/01 | 5d | 3 | Directors turn in documents | 6/5/01 | 6/5/01 | 0d | 4 | Charge Std Leadership prepares materials for department training | 6/5/01 | 6/8/01 | 4d | 5 | Department meetings of Charge Resource Persons | 6/11/01 | 6/15/01 | 5d | 6 | IS training as needed | 6/18/01 | 6/29/01 | 10d | 7 | Department orientation | 6/25/01 | 6/29/01 | 5d | 8 | GO LIVE | 7/1/01 | 7/2/01 | 1d |

| Histograms / Scatter Plot | |
|----------------------------------|--|
| Name | <ul style="list-style-type: none"> ● Scatter Plot Alternative Names <ul style="list-style-type: none"> ○ Scatter Diagram ○ X-Y Graph |
| Definition | <ul style="list-style-type: none"> ● Histogram: a graphical representation of the frequency of one quantitative variable. |

| | |
|---------------------|--|
| | <ul style="list-style-type: none"> ● Scatter Plot: a graphical representation of a bivariate relationship with discrete points ● The inventions of the histogram and scatter plot have been attributed to many people in the scientific and statistical communities. However, the true origins remain unclear. |
| Type of Tool | <ul style="list-style-type: none"> ● Quantitative analysis ● Exploration |
| Common Uses | <ul style="list-style-type: none"> ● Can provide a quick visual overall representation of a relationship ● Can help identify outliers in the data ● “Depicting the distribution, variation, or spread of the data; showing the deviation from standard” (Sobek, D. K., & Smalley, A., 2008, p. 109) |
| Input | <ul style="list-style-type: none"> ● Quantitative data of two variables |
| Output | <ul style="list-style-type: none"> ● Histogram: a graph representing the frequency of one quantitative variable ● Scatter Plot: a graph representing the relationship between two quantitative variables |
| Limitations | <ul style="list-style-type: none"> ● May lead to misclassification of relationship when the pattern is not obvious |
| Examples | <p>Note. The graph below compares different scatter diagrams. From <i>Juran’s Quality Improvement Reference Guide and Tool Kit</i>. by Juran, J. I., (p. 54) 2013, CreateSpace Independent Publishing Platform</p> <div style="text-align: center;"> <p>Scatter Diagram: Common Patterns of Correlation</p> <p>The figure displays six scatter diagrams arranged in a 2x3 grid. Each diagram has a vertical Y-axis and a horizontal X-axis. The patterns are as follows:</p> <ul style="list-style-type: none"> Strong, Positive: Points are tightly clustered along a diagonal line sloping upwards from left to right. Strong, Negative: Points are tightly clustered along a diagonal line sloping downwards from left to right. Weak, Positive: Points are more spread out but still show a clear upward trend. Weak, Negative: Points are more spread out but still show a clear downward trend. Complex: Points form a curved, non-linear pattern, resembling a downward-opening parabola. None: Points are scattered randomly with no discernible trend. </div> <p>Note. The graph below compares different histograms. From <i>Quality Handbook: The Complete Guide to Performance Excellence</i>, (fig. 19.16, p.559) by Juran & De Feo, 2017, McGraw Hill Education</p> |

| Huddles | |
|---------------------|---|
| Name | <ul style="list-style-type: none"> • Daily standup meeting • Tiered daily huddles |
| Definition | <p>Short structured meeting with “quick communication, prioritized around immediate needs” (Graban “Lean Hosp.” p 256)</p> <p>Huddles can occur daily and be tiered to incorporate multiple levels of frontline staff into upper management.</p> |
| Type of Tool | <ul style="list-style-type: none"> • Group communication • Management of people |
| Common Uses | <ul style="list-style-type: none"> • Management of anticipated issues for the day • Tiered daily huddles can be used to escalate issues rapidly through the management chain • Basic team communication |
| Input | <ul style="list-style-type: none"> • Team members • Agenda |
| Output | <ul style="list-style-type: none"> • Communication of the day’s activities, needs, and issues • Plan for problems that do not need a root cause analysis • Escalation of issues that need attention from supervisors |
| Limitations | <ul style="list-style-type: none"> • Not suitable for agendas requiring a significant amount of time |
| Examples | <p>Note. Below is a huddle agenda example. From <i>Lean Hospitals: Improving quality, patient safety, and employee engagement Third edition</i>, (p. 256), Graban M., 2016, CRC Press, Taylor & Francis Group.</p> |

| | |
|--|---|
| | <p>Sample Huddle Agenda</p> <ol style="list-style-type: none"> 1. Safety reminder of the day; review safety issues or risks 2. Immediate problems to be aware of (instruments down or people called in sick) 3. Review of yesterday's metrics and trends 4. New employee suggestions or ideas; updates on previous ideas 5. Share any positive feedback |

| Pareto Charts | |
|----------------------|--|
| Name | <ul style="list-style-type: none"> ● Pareto Analysis ● Pareto Diagram ● 80/20 Rule |
| Definition | <ul style="list-style-type: none"> ● “A Pareto chart is a bar graph. The length of the bars represent frequency or cost (money or time), and they are arranged in order from longest on the left to shortest on the right. Therefore, the chart visually shows which situations are more significant.” (Tague, N. R., 2005, p. 376) ● “The Pareto Chart was developed by Dr. Joseph Juran. He named it after a 19th-century Italian economist Vilfredo Pareto, whose work provided the first example of the unequal distribution Juran called the Pareto Principle: 80 percent of an effect comes from 20 percent of the causes.” (Tague, N. R., 2005, p. 381) ● “The Pareto Principle states that for any given effect (an output of a process or a symptom in this case), there are a number of contributors. These contributors make unequal contributions. By far, a relatively few contributors make the greatest contribution. These are called the vital few. Some contributors occur less often and are called the useful many.” (Juran, J. M., & De Feo, J. A. (Eds.), 2017, p. 165) |
| Type of Tool | <ul style="list-style-type: none"> ● Quantitative analysis ● Root cause analysis |
| Common Uses | <ul style="list-style-type: none"> ● Focuses problem-solving efforts by highlighting the most prominent problem areas ● Helps to prioritize the most significant problems/causes to achieve the most meaningful improvements |
| Input | <ul style="list-style-type: none"> ● List of problem causes (categories) and the frequency of their occurrences |
| Output | <ul style="list-style-type: none"> ● List of problem causes ordered by frequency |
| Limitations | <ul style="list-style-type: none"> ● Not a root cause analysis ● Does not offer solutions |
| Examples | <p>Note. The example Pareto chart below identifies the “vital few” and “useful many.” From <i>The improvement guide: A practical approach to enhancing organizational performance</i> (2nd ed) (fig B.21, p. 437), by Langley, G. J. (Ed.), 2009, Jossey-Bass.</p> |

FIGURE B.21. PARETO CHART.

| PDSA (Plan-Do-Study-Act) | |
|---------------------------------|---|
| Name | <ul style="list-style-type: none"> ● Deming Cycle ● Shewhart Cycle (De Feo & Barnard, 2004, pg 96)) ● PDCA (Plan-Do-Check-Adjust) ● SDSA (Standardize-Do-Study-Adjust) (Tague, 2005) |
| Definition | <ul style="list-style-type: none"> ● “A control model in which managers plan goals, do things to implement plans, check implementation, and act to improve implementation to achieve goals.” (Olden, P. C., 2015, p. 240) ● Origins go back to Edward Deming’s teaching on continuous improvement (Graban, 2016 pg34) |
| Type of Tool | <ul style="list-style-type: none"> ● Iterative Improvement Cycle |
| Common Uses | <ul style="list-style-type: none"> ● Used as a structure for improvement projects that can be iterative ● Can be part of an A3 problem solving report |
| Input | <ul style="list-style-type: none"> ● Managers can keep going through all four steps repeatedly until the goals are met <p>Note: The diagram below uses “check,” whereas others use the word “study.” From <i>Juran’s quality handbook: The complete guide to performance excellence (Seventh edition)</i> (fig 6.6, p. 222) by Juran & De Feo titled (2017)</p> |

| | |
|--------------------|---|
| | <div style="text-align: center;">  </div> <p>ACT: Study the results. What did we learn? What can we predict?</p> <p>PLAN: What could be the most important accomplishments of this team? What changes might be desirable?</p> <p>DO: Carry out the change or test decided upon, preferably on a small scale.</p> <p>CHECK: Observe the effects of the change or test.</p> <hr/> <p>FIGURE 6.6 The PDCA Cycle. (Shewhart and Deming, 1986.)</p> |
| Output | <ul style="list-style-type: none"> ● An improved process |
| Limitations | <ul style="list-style-type: none"> ● Process can be too cumbersome for simple quality problems ● A mindset for continuous improvement is needed for sustainability ● Potentially a long-time frame |
| Examples | <p>Note: The diagram below is a flow diagram for a PDSA cycle. From <i>Understanding A3 thinking: A critical component of Toyota's PDCA management system</i> (Figure 2.1, pg 20) by Sobek, D. K., & Smalley, A., 2008, CRC Press.</p> |

| Problem Statement | |
|-------------------|---|
| Type of Tool | <ul style="list-style-type: none"> ● Goal setting ● Alignment |

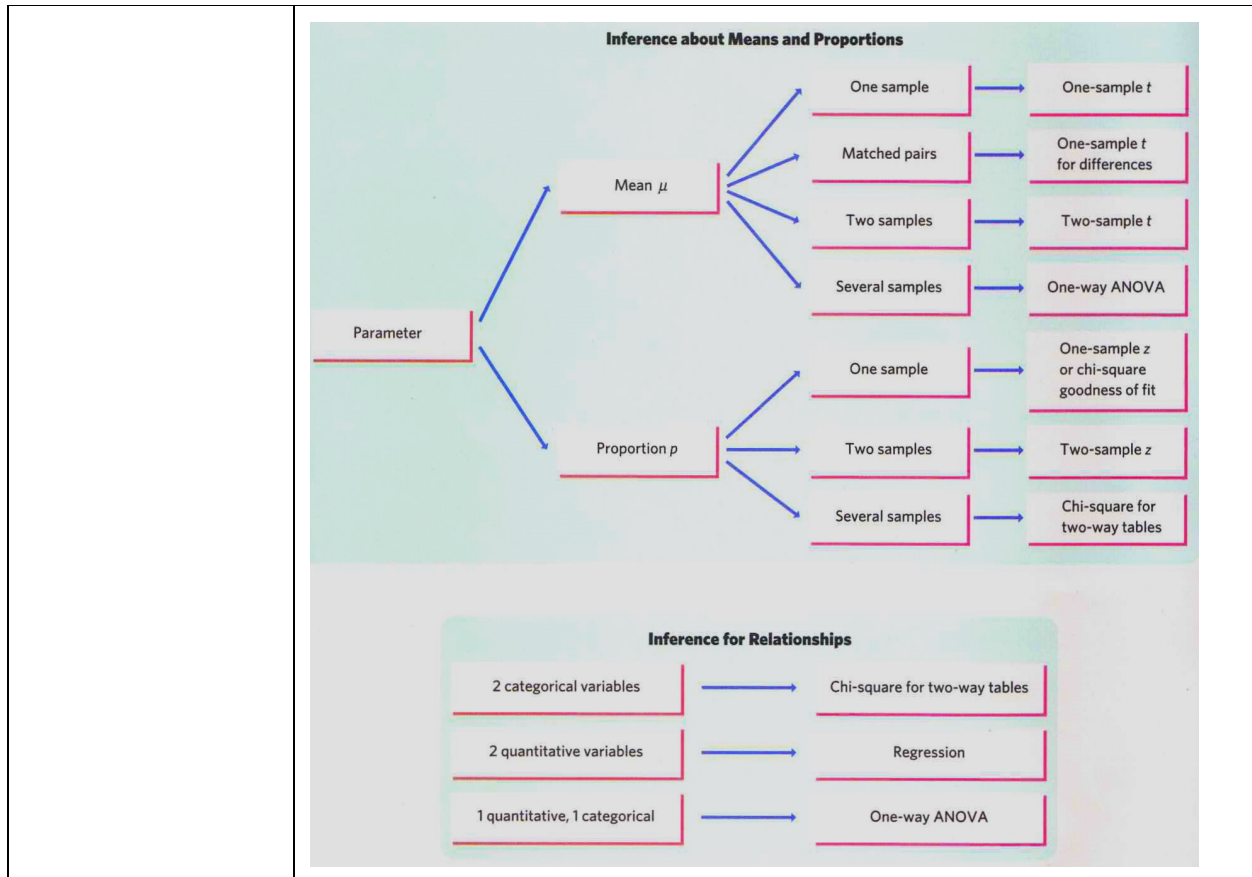

| | |
|---------------------------------------|--|
| Resources for More Information | <ul style="list-style-type: none"> ● Juran, J. M., & De Feo, J. A. (Eds.). (2017). Juran’s quality handbook: The complete guide to performance excellence (Seventh edition). McGraw Hill Education. |

| Resources for More Information | <ul style="list-style-type: none"> ● Tague, N. R. (2005). The quality toolbox (2nd ed). ASQ Quality Press. |

| SMART Objectives | |
|-------------------------|---|
| Name | <ul style="list-style-type: none"> ● SMART Goals ● S.M.A.R.T. Objectives |
| Definition | <p>George Doran introduced the acronym and criteria below</p> <p>Specific – target a specific area for improvement. Measurable – quantify or at least suggest an indicator of progress. Assignable – specify who will do it. Realistic – state what results can realistically be achieved, given available resources. Time-related – specify when the result(s) can be achieved” (Doran, 1981)</p> <p>SMART criteria have broad usage in various industries. There have been efforts to amend and expand the criteria. For example, changing the acronym to SMARTER by adding “Engaging” and “Rewarding” as criteria (MacLeod, 2012)</p> |
| Type of Tool | <ul style="list-style-type: none"> ● Goal and Objective setting ● Alignment |
| Common Uses | <ul style="list-style-type: none"> ● Support the achievement of long-term goals by providing structure and trackability of progress ● Connects the objective with an action plan and appropriate follow up ● Aids managers in the objective-making process |

| | |
|--------------------|--|
| Input | <ul style="list-style-type: none"> ● Details of the target ● The means to measure the outcome ● A person or entity that can be responsible for the objective ● An understanding of resources and scope to make the objective realistic ● A timeline for completion or specific milestones |
| Output | <ul style="list-style-type: none"> ● An object goal that follows Doran's structure <ul style="list-style-type: none"> ○ Specific ○ Measurable ○ Assignable ○ Realistic ○ Time-related ● Not all criteria may be helpful for every objective. For example, some objectives may meet only four criteria. |
| Limitations | <ul style="list-style-type: none"> ● Not appropriate for complex goals, large in scope, with undefinable metrics and timelines. |
| Examples | <p>“To develop and implement by December 31, 198_ an inventory system that will reduce inventory costs by \$1 million, with a cost not to exceed 200 work hours and \$15,000 out-of-pocket initial expenditures” (Doran, p. 35)</p> |

| Statistical Hypothesis Testing | |
|---------------------------------------|---|
| Name | <ul style="list-style-type: none"> ● Hypothesis tests ● Significance tests |
| Definition | Statistical tool for hypothesis testing |
| Type of Tool | <ul style="list-style-type: none"> ● Quantitative analysis |
| Common Uses | <ul style="list-style-type: none"> ● Assess statistical significance (or correlation) between two or more sets of variables ● One of the steps on the pathway to proving causation |
| Input | <ul style="list-style-type: none"> ● Two sets of sampled data |
| Output | <ul style="list-style-type: none"> ● Provides P-value for a given relationship |
| Limitations | <ul style="list-style-type: none"> ● Requires some understanding of statistics for usage and interpretation |
| Examples | <p>Note. The flowcharts below aid in choosing the appropriate statistical test given a type of data. From <i>Practice of Statistics in the Life Sciences Fourth Edition</i> (inside back cover) by Baldi and Moore, 2018, W.H. Freeman, Macmillan Learning.</p> |

| True North | |
|---------------------------------------|---|
| Type of Tool | <ul style="list-style-type: none"> ● Goal and Objective setting ● Alignment |
| Resources for More Information | Smalley, A. (2011, November 2). Toyota's True North Concept. Art of Lean. http://artoflean.com/index.php/2011/11/02/toyotas-true-north-concept/ |

| Value Stream Process Map | |
|---------------------------------|--|
| Name | <ul style="list-style-type: none"> ● Spaghetti diagram ● Material and information flow mapping (Rother, Shook, p. xi) |
| Definition | <ul style="list-style-type: none"> ● Diagram used in continuous improvement cycle detailing the flow of information and materials as they change from suppliers to delivery ● Developed in manufacturing by Toyota, but it has recently been adopted by other industries too, e.g., health care and IT, to increase efficiency and reduce waste. |

| Type of Tool | <ul style="list-style-type: none"> ● Group communication ● Exploration ● Waste reduction | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
|-------------------------------|--|-----------|------|-----|-----|--------|-------|---|------|--------|---------|----------|-----|----------|-------|----------|-----|--------------|----------|----------|-----|--------------|----------|-----------|-----|--------------|----------|--------|-----|-------------------|-----------|--------|-----|--------------------------|-------------------------|------------------------|-------------------------------|
| Common Uses | <ul style="list-style-type: none"> ● Visualizing steps of an existing process and then designing an optimized future state ● Identifies value-adding and non-value-adding components ● Identifies wasteful activities ● Sometimes placed in an A3 diagram or part of a PDCA | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Input | <ul style="list-style-type: none"> ● Accurate description of current conditions of a product/process path ● Detailed knowledge of the current process, including the time needed to execute each step | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Output | <ul style="list-style-type: none"> ● Visual representation of value-adding and non-value-adding steps | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Limitations | <ul style="list-style-type: none"> ● The meaning of material flow icons and information flow icons needs to be widely understood | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Examples | <p>Note. The value stream map below focuses on a patient's path from walking in to getting a treatment plan. From <i>Perfecting patient journeys: Improving patient safety, quality, and satisfaction while building problem-solving skills</i>, (p 34-35) by Worth, et al., 2012, Lean Enterprise Institute.</p> <table border="1"> <thead> <tr> <th>Step</th> <th>P/T</th> <th>D/T</th> <th>%CA</th> </tr> </thead> <tbody> <tr> <td>Log In</td> <td>1 min</td> <td>0</td> <td>100%</td> </tr> <tr> <td>Triage</td> <td>3-5 min</td> <td>5-10 min</td> <td>99%</td> </tr> <tr> <td>Register</td> <td>5 min</td> <td>5-20 min</td> <td>50%</td> </tr> <tr> <td>Examine (RN)</td> <td>5-10 min</td> <td>5-10 min</td> <td>75%</td> </tr> <tr> <td>Examine (MD)</td> <td>5-15 min</td> <td>10-60 min</td> <td>60%</td> </tr> <tr> <td>Enter orders</td> <td>5-10 min</td> <td>10 min</td> <td>98%</td> </tr> <tr> <td>Treat and release</td> <td>10-35 min</td> <td>20 min</td> <td>80%</td> </tr> </tbody> </table> <p>Value-stream summary</p> <table border="1"> <tr> <td>Process time = 34-81 min</td> </tr> <tr> <td>Delay time = 55-370 min</td> </tr> <tr> <td>Lead time = 89-452 min</td> </tr> <tr> <td>% Complete and accurate = 17%</td> </tr> </table> | Step | P/T | D/T | %CA | Log In | 1 min | 0 | 100% | Triage | 3-5 min | 5-10 min | 99% | Register | 5 min | 5-20 min | 50% | Examine (RN) | 5-10 min | 5-10 min | 75% | Examine (MD) | 5-15 min | 10-60 min | 60% | Enter orders | 5-10 min | 10 min | 98% | Treat and release | 10-35 min | 20 min | 80% | Process time = 34-81 min | Delay time = 55-370 min | Lead time = 89-452 min | % Complete and accurate = 17% |
